DETAILED ACTION

Allowable Subject Matter

The indicated allowability of claims 41, 42, 44 and 45 is withdrawn in view of the newly discovered rejection based on Lock et al. (5,591,223). Rejections based on this reference follow.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 41, 42, 44 and 45 are rejected under 35 U.S.C. 102(b) as being anticipated by Lock et al. (5,591,223; of record).

Lock et al. disclose the claimed invention including the steps of inserting a stent 10 and catheter in a bodily vessel and delivering the stent to the desired bodily location, expanding an expandable member to break at least one frangible strut, e.g. 22, and thereafter allowing the stent to self-expand. See, e.g., Figs. 2 and 3, col. 2, lines 14-34 and col. 4, line 17 - col. 5, line 22. It is noted that the limitations directed to the structure have not been given patentable weight insofar as they do not affect the steps of the method in a manipulative sense. Moreover, as the claims use the open transition, "comprising," the additional steps and/or time set forth in Lock et al. are not precluded. The reference discloses at least the claimed, active method steps.
